WORK EXPERIENCE

Research & Development Engineer - Autonomous Aircraft Tug

Fall Semester 2026 – Current

Sponsored by Oshcut Aerospace & The Rocky Mountain Power Foundation

Orem, UT

- Integrating LiDAR and sensor systems on a self-driving electric aircraft tug for military and commercial aircraft.
- Bridging mechanical and electrical work in an interdisciplinary engineering team.
- Targeting a working autonomous prototype by spring to prove commercial viability.

Rocket Scientist - Avionics & Payload Systems Engineer

Fall Semester 2026 – Current

FAR-OUT Rocketry Competition

Orem, UT

- Building the flight computer for a 12-foot liquid rocket. Reliable telemetry and data transmission from a vehicle moving through the air at up to 10,000 ft while managing packet loss.
- Implementing a 1080p / 30fps live video downlink from the rocket in flight
- Designing the payload ejection mechanism that deploys a parachute cartridge at apogee

Robotics Engineering Lead Instructor

May 2026 – August 2026

Idaho Discovery Week

Boise, ID

- Co-founded a summer learning camp and taught an Arduino-based electronics curriculum to 100+ teenage students
- Designed hands-on projects from first physics principles through take-home builds

EDUCATION

Utah Valley University

2025-2028

B.S. Mechanical Engineering | Electrical Engineering Minor

Orem, UT

- Japanese club officer - Competition rocketry team - Tennis club officer

Brigham Young University

2024-2025

B.S. Business Administration

Orem, UT

- 3.6 GPA - Transferred to UVU to pursue engineering
- Launchpad summer business incubator graduate
- Eight-time Miller Grant recipient (\$24,000 total)

SKILLS - C++ - Python - JavaScript - Next.js - LiDAR - Microcontrollers - 3D Printing - Fluent Japanese - Project Management - Team Management - CAD - Solidworks - Fusion 360 - MATLAB - Machining - Prototyping - Additive Manufacturing - Test Plans - Documentation - PCB Layout - KiCad - RF - Telemetry - Wireless - Soldering/Rework
